## INTRODUCING THE NEW YSS CHOPPER RANGE

To cater for the new chopper style Harley-Davidsons and other brands, YSS has developed a specific chopper range with offset mountings top and bottom. No more chain/belt clearance issues! The range covers all twin shock Harleys and available lengths are 11" (280mm), 11½" (290mm), 12" (305mm), 12½" (320mm) and 13" (330mm). The basic gas shock unit uses the proven YSS Radial Piston. It is fully re-buildable and tuneable. Preload adjustments are seamless utilising threaded lock rings.
